

Foreword

The *Chulabhorn Graduate Institute Chemical Hygiene Plan*, or *Chemical Laboratory Safety Manual*, has been the result of collective effort from members of the Chulabhorn Graduate Institute (CGI) Laboratory Safety Sub-Committee. In working in a chemical laboratory, safety should be the first and foremost concern of everyone involved. To ensure safety, rules and regulations in the laboratory are to be strictly followed by all personnel. The CGI Laboratory Safety Sub-Committee is committed to bringing the safest environment to research settings at CGI. The contents in this safety manual have been compiled mainly from the *Chemical Hygiene and Safety Plan* developed by Prof. Kenneth S. Suslick of the Department of Chemistry, the University of Illinois at Urbana-Champaign for whom we gratefully acknowledge.

We hope this manual will be a useful resource for all research personnel at CGI and will ensure safe working practices in the chemical laboratory.

CGI Laboratory Safety Sub-Committee
